AUGUST 2026 RECEIPTS PACK

Budget Performance Tracker evidence summary

EDITOR-APPROVED PACKAGE v1.0 | RECEIPTS CHECKED

What the official record shows

The August reading registers as Watch overall. Revenue and grants are below the YTD baseline and weigh on fiscal metrics; Non-Tax Revenue and Primary Balance are classified Under Pressure. Compensation of Employees and Interest are on track relative to their YTD baselines, providing some fiscal containment. In the next official release, watch whether Tax Revenue, Non-Tax Revenue, Total Revenue & Grants, Primary Balance, Capital Expenditure move closer to their YTD budget baselines, and whether the On Track measures remain contained.

Method

Variance = YTD actual - YTD budget. Gap = variance / absolute(YTD budget) x 100. Revenue, balances and Capital Expenditure are better when higher; Compensation of Employees and Interest are better when lower. Governed thresholds are -3% / -8% after direction adjustment, except Capital Expenditure: -10% / -20%.

Caveats and limitations

Eight selected central-government KPIs only. Statuses are JIF classifications, not official MOFPS ratings. YTD figures are not full-year outturns and may be revised. These tables do not establish causes or programme outcomes. Negative balance comparisons use the absolute baseline; read the signed values alongside the percentage.
