

MAY 2026 RECEIPTS PACK

Budget Performance Tracker evidence summary

PUBLIC EDITION v1.1 | PUBLISHED 2026-07-31 | RECEIPTS CHECKED

What the official record shows

Overall: Under Pressure. Of eight selected central-government KPIs, three are **On Track**, one is **on Watch** and four are **Under Pressure**. The **Fiscal Balance** is the main pressure point: the year-to-date result was **-J\$19,721 million** against a baseline of **-J\$11,460 million**, or **72.1% more negative**.

The May table shows weaker-than-baseline Tax Revenue, Total Revenue & Grants, Primary Balance and Fiscal Balance. Non-Tax Revenue, Compensation of Employees and Interest are **On Track** under JIF's directional rules. Capital Expenditure is **on Watch**.

Eight-KPI evidence table

KPI	YTD baseline J\$ mn	YTD outturn J\$ mn	Variance	Status
Tax Revenue	185,745.581	163,742.951	11.8% below	Under Pressure
Non-Tax Revenue	6,340.991	7,627.689	20.3% above	On Track
Total Revenue & Grants	192,482.892	172,112.803	10.6% below	Under Pressure
Primary Balance	19,843.439	6,672.641	66.4% below	Under Pressure
Fiscal Balance	-11,459.780	-19,721.039	72.1% more negative	Under Pressure
Compensation of Employees	88,399.500	88,361.974	Broadly in line	On Track
Capital Expenditure	11,693.377	9,926.225	15.1% below	Watch
Interest	31,303.219	26,393.680	15.7% below	On Track

How JIF calculated and scored the results

Variance amount = outturn minus baseline. Variance percentage = variance amount divided by the absolute baseline. JIF then applies each KPI's better-when direction and its governed threshold band. Most tracked KPIs, including Non-Tax Revenue, use **On Track** at -3% or better and **Watch** through -8%; Capital Expenditure uses its approved -10% and -20% band.

Capital Expenditure rule

May Capital Expenditure was 15.1124% below the YTD baseline. The approved band is **On Track at -10% or better, **Watch** through -20%, and **Under Pressure** below -20%; May therefore scores **Watch**. Ethon approved this standing rule on 2026-07-31. Watch is a monitoring classification, not a finding that the gap is immaterial.**

Caveats and limitations

#	Caveat
1	This assessment covers eight selected central-government KPIs, not every ministry, programme or public service.
2	The official tables show fiscal outcomes and planned comparisons; by themselves they do not establish why a variance occurred.
3	May figures are year-to-date through May 2026 and may be revised by the Ministry.
4	The revised May workbook's displayed parent-row variance formulas for Capital Expenditure and Interest use April alone. JIF recalculated both percentages from the Apr-May YTD outturn and YTD budget columns; the underlying YTD figures are intact.
5	Capital Expenditure uses the approved KPI-specific band. Watch means the shortfall requires monitoring; it is not a finding that the gap is immaterial.
6	The active workflow contains a wider Non-Tax Revenue tolerance than the governed dictionary. May Non-Tax Revenue was 20.3% above baseline and is On Track under either band, so the difference does not affect this pack; it must be resolved before June scoring.
